Market Technical Outlook

Nifty opened down with a gap traded in a narrow range with negative bias to close in red. On the daily chart, we are observing a downward gap area in the range of 17650 – 17595. Normally, downward gaps act as resistance for prices. In coming trading session if Nifty for first hour trades below 17442 level then it may test 17350 – 17230 levels. On the upside, 17650 – 17760 may act as resistance for the day.

We still maintain our stance that as long as Nifty holds demand zone 17400 – 17600 there is high probability that nifty is likely to test 18000 – 18200 levels in couple of weeks. Hence, cautiously positive approach should be adopted at current level as stock specific activity is likely to continue.
