Market Technical Outlook

Nifty opened lower traded extreme choppiness but recovered from days in the latter half of the trading session which led the Nifty to close in green. On the daily chart we are witnessing four consecutive narrow range body formations which suggest that a consolidation or minor pullback from current level cannot be ruled out. In coming trading session if Nifty for first hour trades above 17380 level then it may test 17460 – 17580 levels. On the downside, 17250 – 17160 levels may act as support for the day. **We still continue to maintain our stance that stock specific activity is likely to continue.**
