### Market Technical Outlook

Nifty opened up with a gap but was unable to sustain the opening gains and selling dragged down nifty to close marginally in red. At present, we are observing a spinning top candlestick pattern which gives small clue that prior uptrend is losing breath. Hence, a consolidation or a pullback cannot be ruled out. Incoming trading session if nifty trades below 19910 level then it is likely to test 19870 - 19800 levels. On the upside, 20090 – 20170 levels may act as resistance for the day.

Since, the breath of market was on the negative side and even the nifty 500 on the daily chart has formed a bearish engulfing pattern. We are of the opinion that some kind of selling in Mid& Small – cap may intensify. Hence cautious approach at current level should be adopted.
