Market Technical Outlook

Nifty opened lower traded in a narrow range with negative bias throughout the day to close in red. On the daily chart, after seven consecutive positive trading sessions we are witnessing a breather. This suggests that a consolidation or minor correction cannot be ruled out. In coming trading session if Nifty trades above 12770 level then it may test 12900 – 13100 levels. On the downside, 12600 – 12480 may act as support for the day.

Broadly, the trend remains up but a consolidation or minor correction from current level cannot be ruled out. Hence, one should adopt buy on decline strategy.
