Market Technical Outlook

Nifty, opened lower but witness upside momentum in the final hour of the trading session which led the nifty to close in green. On the daily chart we are observing five consecutive narrow range body formations which indicate that markets are circumspect at current level. In coming trading session if nifty trades above 19460 level then it may test 19540– 19610 levels. On the downside, 19310– 19250 levels may act as support for the prices.

Looking at the current price action, it is evident that nifty has made higher high formation which suggests that momentum on the upside is likely to continue. In such scenario nifty may test 19563 levels in couple of days. Hence, one should adopt cautiously positive approach at current level.
