Market Technical Outlook

Nifty opened lower in wake of weak global clues traded with negative bias throughout the day to close in red. On the daily chart we are observing that prices have closed below the 50-daysSMA (17464) which suggests that markets are circumspect at current level. In coming trading session if Nifty for first hour trades above 17450 then it may test 17500 – 17550 levels. On the downside, 17250 - 17150 levels may act as support for the day.

Broadly, looking at the current price action we are of the opinion that one needs to adopt cautiously approach at current level.
