Market Technical Outlook

Nifty, opened with positive note, but as day progress we witness selling pressure from higher level and closed in red. On the daily chart, we are observing three consecutive narrow range body formations which suggest indecisiveness prevailing at current level. Further, the prices have marginally close below the 100-day SMA. In coming trading session if nifty trades above 17830 level then it may test 17950 - 18050 levels. On the downside, 17740 – 17660 levels may act as support for the day. **We still maintain our stance that trend remains down and pullback rally, if any is likely to attract selling pressure. Hence, cautious approach at current level should be adopted.**
