Nifty opened up with a gap and traded in a narrow range throughout the day to close in green. On the daily chart we are observing an upward gap area in the range of 17980 – 18015. Normally, upward gap area does act as support for prices. In coming trading session if nifty for first hour trades above 18090 level then it may test 18100 - 18220 levels. On the downside, 17780 - 17640 levels may act as support for the day. Broadly, looking at the current price action we are of the opinion that momentum on the upside is likely to continue. Hence one can trade with positive bias.
