Market Technical Outlook

Nifty opened gap up and traded with positive bias through out day; manage to close at higher level. On the daily chart we are observing breakout of last four days consolidation which suggests that markets will remain trade in positive zone. In coming trading session if Nifty for first hour trades above 18205 level then it may test 18250 - 18350 levels. On the downside, 18080 – 18000 levels may act support for the day.

We still continue to maintain our stance that stock specific activity is likely to continue.
