Nifty, opened positive and traded with the positive bias throughout day which lead to close in green. On the daily chart, we are observing prices have taken support at short term moving averages. Further, the current price action is showing an advance divergence on the RSI which suggests that we may witness upside momentum. In coming trading session if nifty trades above 18650 level then it may test 18750 - 18850 levels. On the downside, 18530 – 18450 levels may act as support for the day. We still continue to maintain our stance that looking at the placement of the moving averages and RSI we are of the opinion that now nifty is likely to test 19000 – 19500 in couple of weeks. Hence, one should adopt buy on decline strategy in this market.
