### Market Technical Outlook

Nifty, opened lower traded in a narrow range with positive bias to close in green. At present we are observing an inside day formation which suggests that markets are cautiously positive at current level. However, there is no sign of weakness but a consolidation at current level cannot be ruled out. In coming trading session if Nifty trades above 14620 levels then it may test 14700 - 14800 levels. On the downside, 14480- 14380 levels may act as support for the day.

**We still maintain our stance that the upward gap area and higher highs formations on the daily Nifty chart suggests that momentum on the upside is likely to continue. Hence, one needs to adopt cautiously positive approach at current level as stock specific activity is likely to continue.**
