Market Technical Outlook

Nifty, opened higher traded with choppiness but witnessed buying in latter half of the session to close in green. On the daily chart we are observing an inside day which suggests that the prior low of 14248 is crucial support. In coming trading session if Nifty holds 14248 and for first hour trades above 14530 level then it may test 14 650 – 14720 levels. On the flip side if breaches 14248 the next support is at 14180 – 14100 levels.

At present prices are trading below the 50-day SMA (14836) and the daily trend has turned down. However, the current price action suggests that we may see rally near to 50-day SMA (14836). Since the trend remains down rallies are likely to attract selling pressure. Hence, one can adopt cautious approach toward the market.
