Market Technical Outlook

Nifty opened higher and momentum on the upside intensified as the day progressed which led the nifty to close in green. On the daily chart, we are observing that prices took support at the 50-days SMA (17775) and have closed above the 21-day SMA (19977). This suggests that the undertone is turning positive. In coming trading session if nifty for first hour trades above 18123 levels then it may test 18250 – 18350 levels. On the downside, 18000 – 17900 levels.

At present one need to adopted cautiously positive approach at current level as stock specific activity is likely to continue.
