### Market Technical Outlook

Nifty opened higher and momentum on the upside intensified as the day progressed which led the nifty to close in green. On the daily chart we are observing that prices have almost tested the 200-day SMA (16811) by making a low of 16839 and formed a strong bull candle. In coming trading session if Nifty for first hour trades above 17375 levels then it may test 17450 – 17550 levels. On the downside, 17250 – 17150 levels may act as support for the day.

**Broadly, looking at the current price action we are of the opinion that 16811 the 200-days SMA now remains a break or a make level going forward.**
