### Market Technical Outlook

Nifty, opened flat, traded with choppiness during the first half, but in second half we witness some selling pressure from higher level. On the daily chart, we are observing breakdown of lower Chanel line in indicate some profit booking we may see, but still overall trend is positive. In coming trading session if nifty trades above 18750 level then it is likely to test 18840 – 18887 (All-time high) levels. On the downside, 18630 – 18560 level may act as support for the day.

**We still continue to maintain or stance that looking at the major pattern of inverse head and shoulder formed above 17900 level suggests that market is heading to test all-time high or even head higher in couple of weeks. Hence, one needs to adopt positive approach at current level as stock specific activity is likely to continue.**
