Market Technical Outlook

Nifty opened higher traded in a narrow range with positive bias throughout the day to close in green. We still continue to maintain our stance that on the daily chart we are observing series of narrow range body formation which suggests that markets are cautiously positive at current level. In coming trading session if Nifty for first hour trades above 15952 levels then it may test 16050 - 16150 levels. On the downside, 15810- 15750 levels may act as support for the day.

We still maintain our stance that stock specific activity is likely to continue in small and Mid-cap stocks.
