### Market Technical Outlook

Nifty opened higher, traded with choppiness but finally managed to close marginally in green. On the daily chart, we are observing that prices have formed a "Doji" candlestick pattern which has closed above the 21-day SMA (19990). This suggests that the markets are circumspect at higher level. In coming trading session if Nifty for first hour trades above 18143 level then it may test 18200 – 18300 levels. On the downside, 18000 – 17900 levels may act as support for the day.

**At present one needs to adopted cautiously positive approach at current level as stock specific activity is likely to continue.**
