Market Technical Outlook

Nifty, opened higher but was unable to sustain the opening gains which dragged down nifty to close marginally in red. In coming trading session if Nifty trades above 15382 level then it may test 15450-15550 levels. On the downside, 15200 –15100 levels may act as support for the day.

We still continue to maintain our stance that a consolidation or minor pullback from current level cannot be ruled out. Hence cautiously positive approach at current level should be adopted. However, stock specific activity is likely to continue.
