Market Technical Outlook

On 16/05/2019 markets opened lower but momentum on the upside intensified as the day progressed which led the indices to close in green. On the sectorial front, Realty, Oil & Gas, Metal and Power ended with decent gains whereas Telecom, Healthcare and FMCG ended on the losing side. The advance decline ratio was in favour of declining counter (Advances= 1164 Declines= 1315).

Pattern Formation: On the Daily Chart, we are observing that prices have bounced from the demand zone and formed a bull candle.

Outlook: The current price action suggests that a bounce from current level cannot be ruled out. In coming trading session if indices trade above 11285 level then it may test 11320 – 11350 levels. On the downside, 11180 – 11150 levels may act as support for the day.

Broadly, we are of the opinion that a pullback rally is in offing and one needs to adopt cautiously positive approach at current level.
