Nifty, opened higher but as unable to sustain the opening gains and selling in the latter half of the session led nifty to close in red. On the daily chart, we are observing a candlestick pattern which resembles a bearish engulfing pattern. The said pattern will get activated once nifty closes below 18264. In such scenario nifty may test 18180-18090 levels. On the upside, 18370-18460 levels may act as resistance for the day. At present we may witness consolidation or minor correction but at lower level near 18100-18000 level buying is likely to emerge.

We still continue to maintain or stance that looking at the major pattern of inverse head and shoulder formed above 17900 level suggests that market is heading to test all-time high or even head higher in couple of weeks. Hence, one needs to adopt positive approach at current level as stock specific activity is likely to continue.
