Nifty opened lower in wake of weak global clue but recovered all its losses during the day to close in green. We continue to maintain our stance that on the daily chart, 19300 to 19500 zone which was first acting as resistance may act as support for price (change of polarity). At present, prices are trading within the mentioned zone. Further, we are seeing that 50-day SMA (19275) is acting as support for the prices. On the daily chart we are witnessing two consecutive narrow range body formations which has closed well above the 50-days (SMA). In coming trading session if nifty trades above 19490 level then it may test 19600 – 19700 levels. On the downside, 19340 – 19270 levels may act as support.

We continue to maintain our stance that looking at current price action, it is evident that 19300 on daily closing period remains a make or break level. We still maintain our stance that a time wise consolidation or a minor correction from current level cannot be ruled out. Since, the trend remains up one needs to adopt buy on decline strategy. However, stock specific activity is likely to continue.
