Market Technical Outlook

Nifty, opened up with a gap but witness minor profit booking during the day to close in green. On the daily chart we are observing an upward gap area in the range of 17112 to 17169. Normally, upward gap area does act as support for the prices. Further we are also observing that the RSI has given a minor breakout from the downward sloping trendline (shown above in the graph). In coming trading session if Nifty trades above 17260 level then it may test 17320 – 17350 levels. On the downside, 17150 – 17030 levels may act as support for the day. **Broadly, nifty is stuck in the range of 16800 to 17500 level. Any decisive break on either side will dictate the direction of the trend. Hence, one should adopt cautiously positive approach at current level.**
