Nifty, opened on a subdued note traded in a narrow range with choppiness and finally close marginally in green. On the daily chart, we are observing that prices for second consecutive trading session have closed above the supply zone of 18000 to 18350. This suggest that momentum on the upside is likely to continue. In coming trading session if nifty trades above 18442 level then it may test 18510 - 18614 levels. On the downside, 18300 – 18200 levels may act as support for the day.

We still continue to maintain our stance that, looking at the position of the short term moving averages and position of the momentum indicator viz. RSI we are of the opinion that momentum on the upside is likely to continue. Hence, one should adopt positive approach at current level.
