Market Technical Outlook

Nifty opened higher, and momentum on the upside intensified as the day progressed which led the nifty to close near days high. On the daily chart, we are observing a Bull candle which suggests further upside momentum. In coming trading session if nifty for first hour trades above 16300 level then it may test 16400 – 16480 levels. On the downside 16150 – 16050 levels may act as support for the day.

Broadly, looking at current price action, we are of the opinion that a pull rally is likely to continue. However, we still maintain our stance that on the daily chart prices are making a lower top lower bottom formation. Hence, rallies are likely to attract selling pressure. At present, one needs to adopt cautiously positive approach at current level.
