Nifty opened higher traded with positive bias throughout the day to close in red. We still maintain our stance that prices are trading within the supply zone of 11036 to 11433 (shown in red in the above graph). At present, prices have marginally closed above the upward sloping trendline (shown in blue in the above graph). In coming trading session if prices trade above 11275 level then it is likely to test 11350 - 11430 levels. On the downside, 11100 - 11000 levels may act as support for the day.

We maintain our stance that Nifty is trading within the supply zone of 11036–11433. Hence cautiously positive approach should be adopted at current level as stock specific activity is likely to continue.
