### Market Technical Outlook

Nifty, opened lower in wake of weak global clue but witness upside momentum in the latter half of the trading session which led nifty to close in green. On the daily chart we are observing that prices have reclaimed the 20-daySMA (17247) which suggests that sentiment has turned positive. Further, we are also seeing that RSI has given downward slopping trendline breakout (shown above in the graph). Hence momentum on the upside is likely to continue. In coming trading session if nifty trades above 17330 level then it may test 17430– 17510 levels. On the downside, 17200– 17100 levels may act as support for the day.

Since, RSI has given downward slopping trendline breakout which is strong buy signal. Hence, one should adopt positive approach at current level.
