Market Technical Outlook

Nifty, opened higher traded with positive bias throughout the day to close in green. On the daily chart, we are observing series of narrow range body formations with higher highs. This suggests that momentum on the upside is likely to continue. In coming trading session if Nifty trades above 13780 level then it may test 13900 - 14000 level. On the downside, 13600 - 13500 levels may act as support for the day. **At present the prices have tested the 127% Fib levels (13758 shown above in the graph) but has given close below it. However, if nifty closes above the mentioned level with good volumes then nifty is likely to head towards Fib161.8% (15470 shown above in the graph) in couple of months. Hence, one needs to adopt positive approach towards the market**
