Market Technical Outlook

Nifty, opened higher but was unable to sustain the opening gains which dragged down nifty to close in red. On the daily chart, we are observing a three spinning top candlestick pattern making lower low. This gives small clue that prior uptrend is losing breath. In coming trading session if Nifty trades below 15078 level then it is likely to test 15000 – 14900 levels. On the upside, 15250– 15330 levels may act as resistance for the day.

We maintain our stance that Nifty has strong demand in the range of 14900 – 15100 level from where we may witness a bounce. At present one needs to be cautiously positive on the market as stock specific move is likely to continue.
