Market Technical Outlook

Nifty, opened higher, witness mild profit booking at higher level but managed to close in green. On the daily chart, we are witnessing three consecutive candles with higher high formation which indicates that momentum on the upside is likely to continue. In coming trading session if nifty trades above 19780 then it may test 19850– 19900 levels. On the downside, 19650– 19570 levels may act as support for the day.

Broadly, looking at current price action we are of the opinion that momentum on the upside is likely to continue. Hence, one needs to trade with positive bias as stock specific activity is likely to continue.
