Nifty, opened up with a gap traded with positive bias throughout the day to close in green. On the daily chart we are observing an upward gap area in the range of 17328 to 17434. Normally upward gap area does act as support for the prices. In coming trading session if nifty trades above 17527 level then it may test 17600 - 17720 levels. On the downside, 17360–17250 levels may act as support for the day.

Broadly, looking at the position of RSI, it is evident that momentum on the upside is likely to continue. Hence, one should adopt positive approach at current level.
