Nifty, opened lower initially traded with negative bias but witnessed buying in the latter half of the session to close in green. On the daily chart, we have seen that prices are maintaining higher high formations which suggest that the undertone in the market is positive. In coming trading session if Nifty trades above 12950 level then it may test 13100 - 13200 levels. On the downside, 12800–12650 may act as support for the day.

Broadly, the trend remains up but a consolidation or minor correction from current level cannot be ruled out. Hence, one should adopt buy on decline strategy.
