Nifty, opened lower, traded with choppiness but finally close near days' low. On the daily chart, we are observing that nifty has close below the immediate swing low of 18345. This suggests weakness. Incoming trading session if nifty trades below 18250 level then it may test 18150 – 18040 levels. However, a bounce from current level up to 18350 - 18460 levels cannot be ruled out.

Broadly, we are of the opinion that markets are now likely to test 18081 (50-daysSMA). However, in such market stock specific activity is likely to continue.
