Market Technical Outlook

Nifty opened higher made all-time high of 17792 and witnessed profit booking at higher level which dragged Nifty to close in red. On the daily chart we are still observing a higher high formation. The current price action has formed a spinning top candlestick pattern which suggests that a consolidation or minor pullback cannot be ruled out. In coming trading session if Nifty for first hour trades above 17658 level then it may test 17700– 17780 levels. On the downside, 17480 – 17400 levels may act as support for the day.

We still continue to maintain our stance that stock specific activity is likely to continue.
