Market Technical Outlook

Nifty opened higher traded with choppiness but finally managed to close in green. We maintain our stance that there is a negative divergence in the RSI. Further, prices are trading below the 20-day SMA (17676). In coming trading session if Nifty for first hour trades below 17570 level then it may test 17500 - 17460 levels. On the upside, 17750 - 17860 levels may act as resistance for the day.

Since, prices are trading below the 20-day SMA (17676) one needs to adopt cautiously positive approach at current level. However, stock specific activity is likely to continue.
