Market Technical Outlook

Nifty opened higher but was unable to sustain the opening gains and selling intensified in the latter half of the session to close in red. On the daily chart we are observing a bear candle which suggests that minor correction or consolidation at current level cannot be ruled out. In coming trading session if Nifty for first hour holds 18350 levels then it may test 18500 – 18550 levels. On the downside, 18300 - 18220 levels may act support for the day.

We still continue to maintain our stance that stock specific activity is likely to continue.
