### Market Technical Outlook

Nifty, opened lower in wake of weak global clue but recovered some of its losses during the day to close in red. On the daily chart, we are observing that prices have marginally close above the 50-days SMA (19623). Hence, as long as nifty holds the 50-days SMA (19623) there is high probability that nifty may test 19730 – 19850 levels. On the downside, 19510 – 19 430 levels may act as support for the day.

**We maintain our stance that the 50-days (19623) is a make or break level. If nifty manages to trade above, it there is high probability that nifty may continue its upside momentum. Hence, positive approach should be adopted at current level as stock specific activity is likely to continue.**
