**Market Technical Outlook** 

Nifty opened higher but was unable to sustain the opening gains and selling intensified as the day progressed which led nifty to close in red. On the daily chart, we are observing three consecutive narrow range body formations with lower lows. This suggests that undertone has turned negative. In coming trading session if Nifty for first hour trades below 16960 level then it may test 16840 - 16730 levels. On the upside, 17100 - 17230 levels may act as resistance for the day.

Broadly, looking at the current price action it is evident that the prior bottom of 16782 is under threat. Hence one needs to adopt cautious approach at current level.
