Nifty, opened lower in wake of weak global clue made a new 52week low of 16828 from where some recovery was seen in the final hour of the trade to close in red. On the daily chart, we are observing a bullish hammer at the strong demand zone of 16900-16800. The bullish implication of the said pattern would be activated once nifty trades and close above 17066 level. In such scenario nifty may test 17180 – 17270 levels. On the downside, 16890-16770 levels may act as support for the day. We still maintain our stance that prices are trading below the rising 200-days SMA (17495). Hence, one needs to adopt cautious approach at current level.
