Nifty, opened higher, traded with choppiness during the day but finally managed to close in green. On the daily chart, we are observing that prices breached the 10-days SMA (18708) by making a low of 18660 but managed to close well above it. In coming trading session if nifty trades above 18840 level then it is likely to test 18950–19050levels. On the downside, 18700–18580 level may act as support for the day.

We still continue to maintain or stance that looking at the major pattern of inverse head and shoulder formed above 17900 level suggests that market is heading to test all-time high or even head higher in couple of weeks. Hence, one needs to adopt positive approach at current level as stock specific activity is likely to continue.
