Nifty, opened higher but was unable to sustain the opening gains which drag nifty to close in red. We maintain our stance that on the daily chart, we are observing series of narrow range body formation which indicates that markets are circumspect at current level. In coming trading session if nifty trades above 18360 level then it may test 18400 - 18510 levels. On the downside, 18200—18110levels may act as support for the day.

We still continue to maintain our stance that, looking at the position of the short term moving averages and position of the momentum indicator viz. RSI we are of the opinion that we may see some consolidation or minor correction but eventually we are likely to head higher and touch all-time high of 18604 in couple of weeks. Hence, one should adopt positive approach at current level.
