Market Technical Outlook

Nifty opened higher but was unable to sustain the hourly gains and selling in the latter half of the session intensified as the day progressed which led nifty to close in red. At present, prices have come near the upward gap area of 20950 -21074. Normally, upward gap area does act as support for the prices. In coming trading session if nifty for first hour trades above 21200 level then it may test 21250 – 21340 levels. On the downside, 21050 – 20930 levels may act as support for the day.

Broadly, we are of the opinion that the above mentioned gap area is likely to act as support for the prices and a bounce from those level cannot be ruled out. Hence, one should adopt cautiously positive approach at current level as stock specific activity is likely to continue.
