### Market Technical Outlook

Nifty, opened lower and momentum on the downside intensified as the day progressed which dragged Nifty to close in red. On the daily chart, we are observing four trading sessions with lower lows. This suggests that markets are witnessing minor correction of previous rise. At present 21-day SMA (14750) may act as support for the prices. In coming trading session if Nifty trades below 14898 level then it is likely to test 14850 - 14750 levels. On the upside, 15150– 15250 levels may act as resistance for the day.

**We still maintain our stance that Nifty has strong demand in the range of 14900 – 15100 level from where we may witness a bounce. At present one needs to be cautiously positive on the market as stock specific move is likely to continue.**
