### Market Technical Outlook

Nifty, opened higher traded with extreme choppiness but finally managed to close near days high. On the daily chart, we are observing that prices tested the 20-days SMA (18107) by making a low of 18060 and has close above it. In coming trading session if nifty trades above 18220 level then it may test 18310 – 18440 levels. On the downside, 18100 – 18000 levels may act as support for the day.

**We still continue to maintain or stance that looking at the major pattern of inverse head and shoulder formed above 17900 level suggests that market is heading to test all-time high or even head higher in couple of weeks. Hence, one needs to adopt positive approach at current level as stock specific activity is likely to continue.**
