Nifty opened on a subdued note traded in a narrow range with positive bias to close in green. On the daily chart, we are observing two consecutive spinning top candlestick pattern within the supply zone of 16443 to 16793. In coming trading session if nifty for first hour trades above 16630 level then it may test 16740 - 16820 levels. On the downside, 16500 – 16380 levels may act as support for the day.

We still maintain our stance that prices have convincingly reclaimed the 50-days SMA (16142). We are of the opinion that one needs to adopt cautiously positive approach at current level as stock specific activity is likely to continue.
