Market Technical Outlook

Nifty opened down with a gap, but in second half we witnessed some recovery from lower level. On the daily chart we are observing Nifty trading above 30 day SMA and tested upward gap area. We are also observing “Doji” candlestick formation, it indicate we can see some consolidation going forward. In coming trading session if Nifty for first hour trades above 17850 level then it may test 18000 – 18050 levels. On the downside, 17650– 17450 levels may act as support for the day.

At present, one needs to adopt cautiously positive approach at current level. However, stock specific activity is likely to continue.
