Source: BSE

Nifty, opened lower in wake of negative global clue, traded with negative bias throughout the day to close in red. On the daily chart, we are observing an upward trendline breakdown in RSI. Further, we are also observing that the prices have tested the upward gap area of 18103 to 18259. Normally, upward gap area does act as support for the prices. Incoming trading session if nifty trades above 18190 level then it may test 18250 - 18330 levels. On the downside, 18040 - 17930 levels may act as support for the day.

We still continue to maintain our stance that, looking at the position of the short term moving averages and position of the momentum indicator viz. RSI we are of the opinion that we may see some consolidation or minor correction but eventually we are likely to head higher and touch all-time high of 18604 in couple of weeks. Hence, one should adopt positive approach at current level.
