**Market Technical Outlook** 

Nifty opened higher but was unable to sustain the hourly gains and selling in the latter half of the session dragged down nifty to close in red. On the daily chart, we are observing two narrow range body formation which has close below the 20-daysSMA (21673). In coming trading session if nifty trades above 21630 level then it may test 21680 - 21750 levels. On the downside, 21450 - 21370 levels may act as resistance for the day.

We still maintain our stance that looking at the current price action on daily charts it is evident that 22124 may be an intermediate top. Hence, one needs to adopt cautious approach at current level.
