Nifty opened lower in wake of weak global clues but recovered some of its losses during the day to close in red. On the daily chart, we are observing that the prices tested the 200-daysSMA (16876) by making a low of 16843 and has formed positive candle. This suggests that we may witness a pullback rally. In coming trading session if Nifty for first hour trades above 17150 level then it may test 17200 – 17240 levels. On the downside, 17000 – 16900 levels may act as support for the day.

We continue to maintain our stance that 16876 the 200-days SMA now remains a break or a make level going forward.
