Nifty, opened down with a gap and momentum on the downside intensified as the day progressed which led the nifty to close near days' low. On the daily chart, we are observing that prices are trading well below the falling 20-days SMA (17795) and 50-day SMA (17986). This suggests weakness. In coming trading session if nifty trades below 17500 level then it may test 17390–17280 levels. On the upside, 17650–17860 levels may act as resistance for the day.

We continue to maintain our stance that the falling 50-day SMA (17986) is crucial resistance. As long as nifty trades below the mentioned level one needs to adopt cautious approach at current level.
