Market Technical Outlook

Nifty opened on subdued note initial traded with negative bias but witnessed buying in the latter half of the session to close in green. On the daily chart, prices have closed well above the falling 50-days SMA (17237). This suggests that momentum on the upside is likely to continue. In coming trading session if Nifty for first hour trades above 17335 level then it may test 17420 – 17500 levels. On the downside, 17200 – 17100 levels may act as support for the day.

As expected and mentioned prices took support at the upward gap area (16837 to 17175) and has strongly bounce back at higher level. We maintain our stance that one needs to adopt buy on decline strategy at current level.
